

PROCOR CHEMICALS, INC.

Technical Data Sheet
PRO Spot
PKG: 55 gal/b275 gal. tote tanks

DESCRIPTION

PRO Spot Lubricant Spotting Fluid is an emulsion mud product, designed for freeing stuck pipe. It is easily applied at the rig site in concentrated form or diluted with conventional mixing equipment and performs in both diesel and synthetic base fluids. PRO Spot Lubricant Spotting Fluid can also be used to prepare a complete oil based drilling fluid as it contains a filtration control additive, a viscosifier, and a very effective emulsifier. Free pipe is stable to continuous temperatures up to 300°F +.

TYPICAL PROPERTIES

Appearance	Black liquid
specific gravity, g/cc	1.02

PERFORMANCE ADVANTAGES

- Stable to over 300 deg F
- Helps to emulsify water into oil based fluids
- Compatible with common drilling fluid weighting agents
- Easy to apply liquid concentrate

TREATMENT RATE TYPICAL

10% to concentrated pills.

PACKAGING

HP Spot is offered in 55 gal drums and 275 gal. tote tanks..
